Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-30 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kobe-shi, European Patent Application, EP 0948978A2 in view of Junkins et al., U.S. Patent No. 6,198,486.

3. As per claims 1, 11 and 21, Kobe-shi discloses a method of generating a shadow in a virtual three-dimensional (3D) space (abstract), comprising: projecting elements of the 3D model onto a surface in the virtual 3D space (abstract). However, Kobe-shi does not disclose adjusting a resolution of a 3D model. This is disclosed in Junkins et al in column 1 lines 10-45. It would have been obvious to one of ordinary skill in the art at the time the invention was made to adjust the resolution of the model in Kobe-shi because this would make it easier to remove excessive details if less detailed models were required. Also Kobe-shi does not disclose rendering a shadow having the adjusted resolution of the 3D model on the surface using the projected elements. This would have been obvious to one of ordinary skill in the art at the time the invention was made because adjusting the resolution of the 3D model would correspondingly affect the resolution of the image projected from it.

4. As per claim 2, 12 and 22, Kobe-shi discloses wherein the elements of the 3D model are projected based on a location of a virtual light source in the virtual 3D space (abstract).

5. As per claims 3, 13 and 23, the rejection is based on the same statements of claim 1 above. Since this is a multi-resolution model then it would be possible to repeat claim 1 with a different resolution.

6. As per claims 4, 14 and 24, Junkins et al discloses wherein adjusting comprises reducing the resolution of the 3D model (column 1 lines 10-45).

7. As per claims 5, 15 and 25, Junkins et al discloses wherein adjusting comprises removing elements of the 3D model (column 1 lines 10-45).
8. As per claims 6, 16 and 26, Junkins et al discloses wherein the 3D model comprises a multi-resolution model (column 1 lines 10-45).
9. As per claims 7, 17 and 27, Junkins et al discloses providing a user interface for use in adjusting the resolution of the 3D model (column 1 lines 10-15).
10. As per claims 8, 18 and 28, Junkins et al discloses rendering the 3D model at its original resolution (column 1 lines 10-45).
11. As per claims 9, 19 and 29, Junkins et al discloses wherein the elements comprise vertices of the 3D model (column 1 lines 10-45).
12. As per claims 10, 20 and 30, Junkins et al discloses wherein the elements comprise polygons of the 3D model (column 1 lines 10-45).
